Product basics

Product name

Gemini Twin Insulin Box — Dual Pack

Core theme

Two pens, two chambers — each with its place.

Positioning

A professional-grade portable smart constant-temperature storage box, designed to give insulin users a professional, convenient insulin carry solution.

What it is

A portable, phase-change insulin cooling box that holds a long-acting and a short-acting pen in two separate chambers — no power, no noise, no second box.

Core selling points — the strongest differences

Twin-chamber design

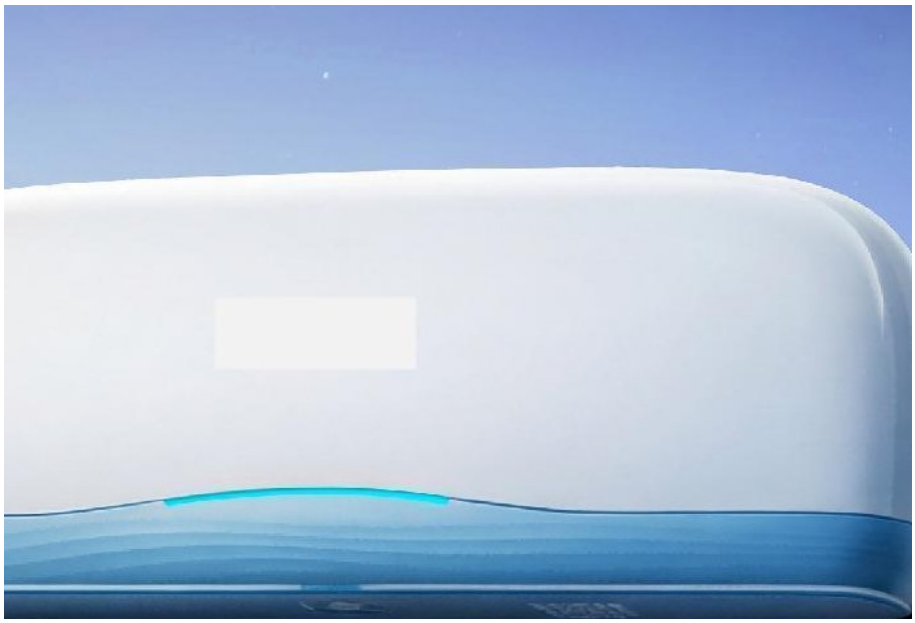

An innovative dual-chamber structure holds a long-acting and a short-acting insulin pen at the same time. No more carrying multiple boxes.

No-charging constant-temperature technology

Phase-change material needs no external power. At 37 °C summer ambient the chamber stays below 25 °C; at –5 °C winter ambient it stays above 5 °C.

Dual temperature display

A clear screen shows inside and outside temperature in real time, so you spot a problem the moment it starts — keeping medication safe.

Functional advantages & user experience

Four-layer insulation

Eco-grade shell, stainless steel and a 2 mm vacuum layer — layered protection that locks in a stable temperature.

Smart reminder system

A breathing-light battery indicator and an injection timer help prevent missed or double doses.

Professional antibacterial design

An antibacterial sealed chamber and a precise buckle keep things stable and hygienic, avoiding cross-contamination.

Light & portable

As light as 430 g and compact enough to slip into any bag with no burden.

Premium design

A modern, minimal look that breaks the medical-product mould — carried like an everyday accessory.

Complete accessories

A custom protective case is included, adding portability and drop protection.

Who it's for

Core users

Insulin-dependent people who inject daily and need strict temperature control.

Extended users

Anyone who needs precise temperature control for medicines, cosmetics or samples.

Age 24–50

From young professionals to mid-life users with spending power.

The need

Frequent travel and a quality lifestyle call for a discreet, convenient, safe way to carry personal items.

Scenarios

Outdoor · Office & commute · Travel

Specifications & how to order

Cooling method	Phase-change (passive)
Protection zone	2–28 °C, rated
Summer · 37 °C ambient	Chamber below 25 °C
Winter · –5 °C ambient	Chamber above 5 °C
Chambers	2 pens — long + short acting
Display	Dual temperature · injection timer
Net weight	430 g
Insulation	4-layer, 2 mm vacuum
Chamber	Antibacterial, sealed
Minimum order	500 units (standard & OEM)
Lead time	7–15 days · samples in 5 days
Certification	CE · RoHS · ISO-aligned QC
